SoundEdge® Ceiling Baffles

SoundEdge® ceiling system offers flexible building blocks to easily achieve enhanced acoustical performance and design effects. Its modular single fin design, available in a multitude of lengths and depths, is easy to install, and can be mixed and matched in numerous configurations. SoundEdge® is constructed from our Soft Sound® acoustical material (100% PET plastic with up to 60% recycled content) to drastically reduce sound reverberation.

Easily removable fins allow access to larger systems and the open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

SoftGrid®

Whether using one module or many, the SoftGrid® family of ceiling elements opens up a multitude of possibilities for design and acoustical impact. Choose your pattern from our SoftGrid® library and rely on this simple-to-assemble, easy-to-hang approach that works with most ceiling types. Modules can be used as a singular feature or connected with our bridge clips to create a dynamic architectural field. And with our recent updates, most modules are now available in Duo finish options, unlocking new possibilities for acoustic design & performance.

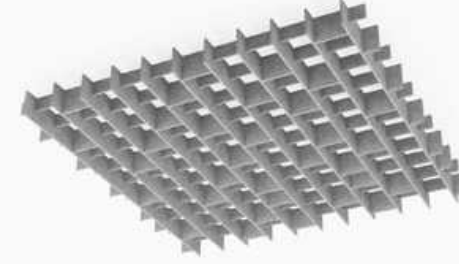

SoftGrid® modules can be trimmed down to a minimum of four fin intersections.

SoftScreen®

SoftScreen® acoustic wall panels from Arktura make it easy to dramatically define spaces and aesthetics while reducing the impact of noise, at any scale. Made from our high performance sound attenuating Soft Sound® material, SoftScreen® panels are available in a variety of patterns and colors, including wood textures, all able to be mixed and matched as desired. Choose from a number of install options, including direct mount, cable suspension, or sliding with our track and trolley system. Whatever your needs, SoftScreen® elegantly enhances spaces and establishes privacy with ease.

4' x 8' or 4' x 9' Panels can be mounted: direct, cable hung, hanging bracket or on a sliding track.

Vapor®

Vapor® wall and ceiling panel system achieves modern expression through abstract patterns. Its subtle complexity lends visual interest across large spans and multiple spaces. Add an optional backer, select from our acoustically performative and beautiful Soft Sound® material or close off the system with our light-transmitting frosted polycarbonate backer.

Vapor® panels are manufactured from aluminum that is on average 50% thicker than the competition, which in combination with our precision processes result in unrivaled flatness.

Achieve uninterrupted patterning across your space. Vapor® patterns have perforations that wrap around the edges of each panel, concealing where patterns start and end.

VAPOR DESIGN OPTIONS

ECOUSTIC® PANEL COLLECTION

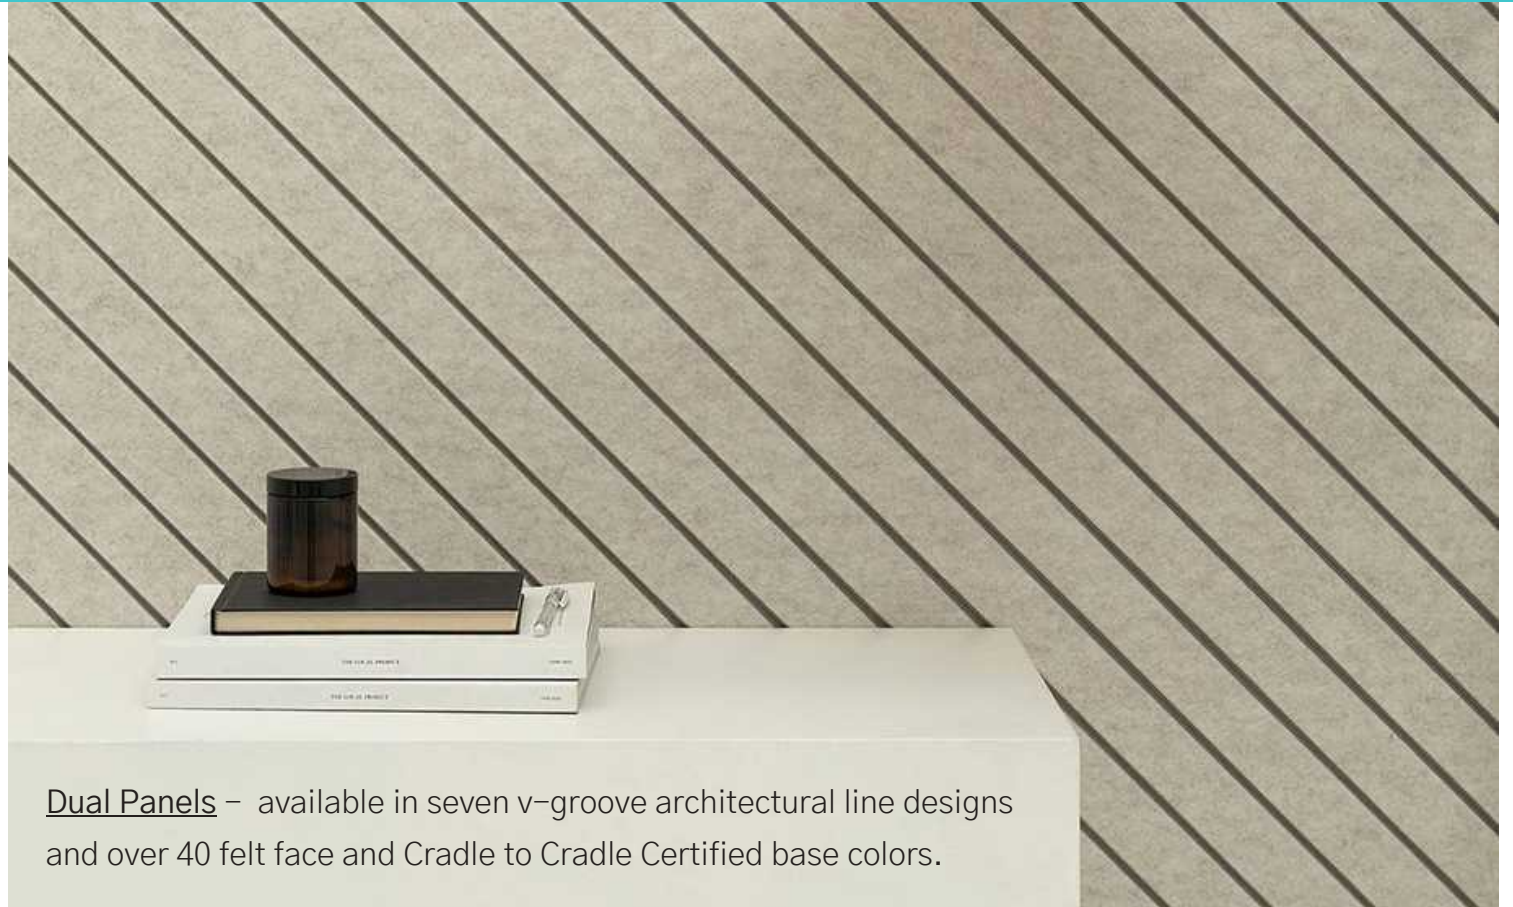

ecoustic® Panels are designed to reduce and control reverberated noise in building interiors. The acoustic Panel Collection consists of polyester felt fabric adhered to any of four different thicknesses of PET acoustic core. This collection is available in 34 color-ways.

- Application: ceiling or wall
- Content: 100% PET (up to 80% recycled content)
- NRC Rating: 0.30 – 1.0 Depending on thickness and air gap, please refer to specifications
- Panel Size: 47 5/8" x 107 1/16" / (4) Thickness – .31", .53", .98" or 1.97"

Anodized aluminum trim is available to provide a finished edge profile where desired. An anodized T trim is also available for a custom look between seams.

Framing to support any design.

Minimally designed, precision extruded aluminum profiles provide exceptional support and durability, while accentuating the natural beauty of glass.

Bead-blasted aluminum finish provides a softer look and is scratch and fingerprint resistant.

More durable than powder coatings, PVDF resin-based coating is both functional and decorative. It won't chalk, pit, chip, age or lose its color and sheen.

Available in 9 finishes, including 5 premium metallic finishes.

Outdoor Planters w/ Casters, 2 Sizes, Drip Tray and Flower Pot
Painted aluminum – Textured Black Ral 9011, Textured White, Textured Forge Grey

Pixel

Grown in the woodlands and mountain ranges of Northern Scandinavia. Pixel (approx. 2" x 2" cubes) is fire-resistant, hypoallergenic, and completely maintenance-free to allow the outdoors in. The unique moss purifies the air by constantly removing airborne particles through a cycle of absorption and release of humidity.

Available in 15 colors.
