# Arborisa™

Arborisa™'s biophilic acoustic modules channel natural inspirations to craft a collection of designs that combine organically angular accents and abstract linear forms. These large-scale acoustic clouds span across spaces, providing robust auditory coverage to inhabitants below. Designed to emulate the expansive look of a tree canopy, these modules, made of our Soft Sound® acoustic material, branch off in various directions, providing an array of acoustic coverage whether as a single module or grouped together.

The elevated aesthetic of this acoustic cloud system arrives in four naturally expansive designs: Arborisa™ Nest, Arborisa™ Axil, Arborisa™ Aura, and Arborisa™ Denza.

# SoftShapes™

SoftShapes™ brings a new angle to commercial acoustic design in three distinct form factors: Tri, Quad, and Hex for three, four, and six sides of auditory bliss. These versatile geometric building blocks, available in a wide range of sizes, can be wall or ceiling-mounted, supplying acoustic attenuation where you need it most.

SoftShapes™ modules can be tiled across a space to create a continuous grid look, used as freestanding clouds, mixed with other Arktura Systems (TriSoft®, SoundStar®, SoftGrid®, etc.) or in dynamic clusters to adaptively maximize your design intent.

# SoftGrid®

Whether using one module or many, the SoftGrid® family of ceiling elements opens up a multitude of possibilities for design and acoustical impact. Choose your pattern from our SoftGrid® library and rely on this simple-to-assemble, easy-to-hang approach that works with most ceiling types. Modules can be used as a singular feature or connected with our bridge clips to create a dynamic architectural field. And with our recent updates, most modules are now available in Duo finish options, unlocking new possibilities for acoustic design & performance.

SoftGrid® modules can be trimmed down to a minimum of four fin intersections.

# SoundEdge®

## Ceiling Baffles

SoundEdge® ceiling system offers flexible building blocks to easily achieve enhanced acoustical performance and design effects. Its modular single fin design, available in a multitude of lengths and depths, is easy to install, and can be mixed and matched in numerous configurations. SoundEdge® is constructed from our Soft Sound® acoustical material (100% PET plastic with up to 60% recycled content) to drastically reduce sound reverberation.

Easily removable fins allow access to larger systems and the open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

# SoftSpan®

SoftSpan® is an award-winning, highly versatile, innovative acoustic baffle system, that delivers the look of coffered ceilings or large timber trellises without the weight, all while reducing the impact of noise across any interior space. Constructed from our high-performance PET Soft Sound® acoustical material, Softspan® is available in various colors and finishes to fit any design vision. Choose from a library of options to find a match to complement and enhance your space, including a lineup of Soft Sound® Wood Textures to replicate the character and warmth of timber ceiling trellises.

SoftSpan® modules can be trimmed in the field.

Trellis & Coffer Modules | Optional Panel Lights

# Atmosphera®

Atmosphera® builds on Arktura's experience designing and manufacturing custom solutions to deliver a dynamic, scalable, and affordable family of modular ceiling systems. Choose from linear, organic, and faceted designs, available in a wide range of colors.

Easily Field Modifiable. This system allows for some simple modifications that can allow it to adapt to your space without having to design a custom system.

Continuous Straight Baffles. Utilizing a hidden fin and frame alignment system, Atmosphera® provides continuity in all directions across your space. Our custom formulated material thickness and density ensures rigidity that limits deflection.

## Adaptive

Take your design to new heights using Arktura's Atmosphera® Adaptive family of products—a modular, configurable, open baffle ceiling system with a range of tailored visual profiles and options. Atmosphera® Adaptive can adapt to any space and help you achieve bold, beautiful results in architecture and interior design.

No Field Trimming Necessary. All modules are built to your unique project specifications, removing the need for any field trimming and assuring easy installation.

Curving Acoustic Baffles. Arktura offers a proprietary curved baffle system with no visible hardware.

## Atmosfera Adaptive – Analog

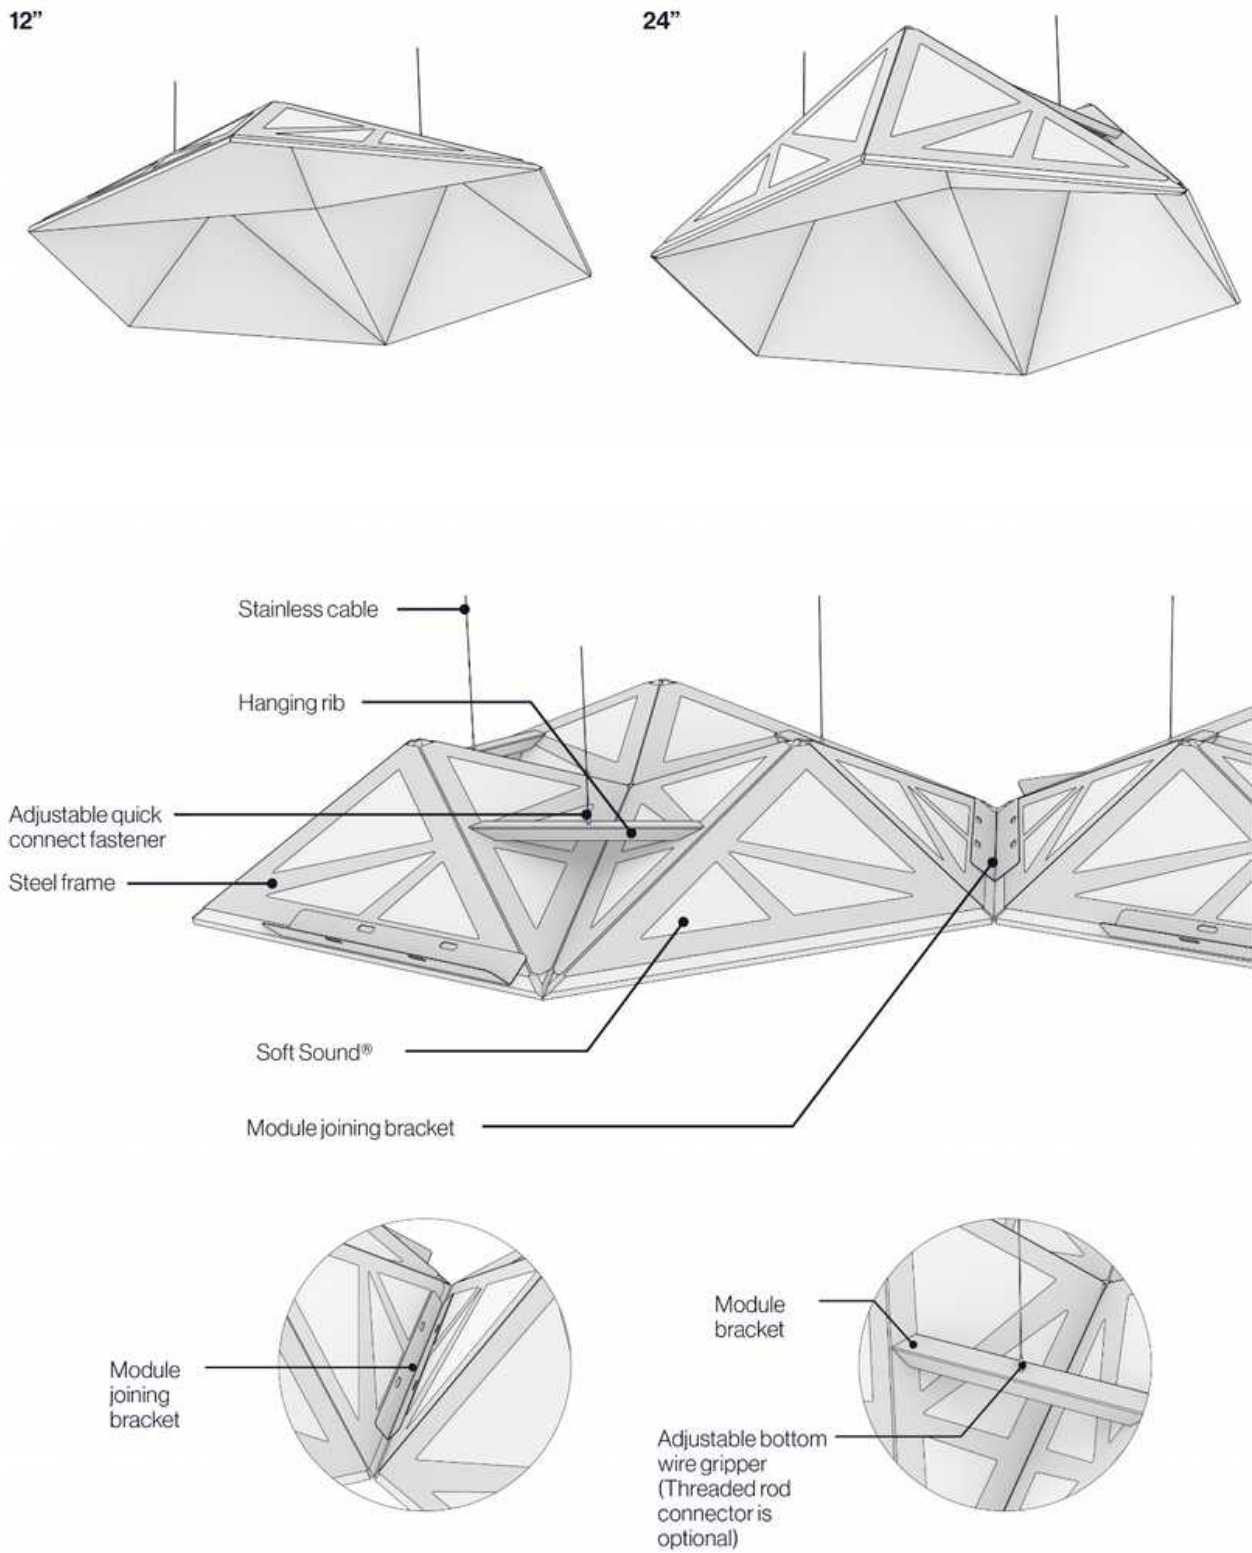

## SoundStar®

SoundStar® ceiling system's hexagonally shaped cellular coffers offer a scalable way to add geometric dimensionality and disrupt sound's ability to travel across a space. Each module is comprised of angled surfaces made from our Soft Sound® acoustical material (100% PET plastic with up to 60% recycled content) with a metal substructure. Choose from 12" or 24" deep modules, to mix and match as desired. Thanks to its flexible, modular configuration, SoundStar® can adapt to a range of spaces and design visions, to create a spectacular visual effect. The design and sound capturing capabilities of this system offer a fresh effective approach to high performance sound attenuation.

# TriSoft®

TriSoft® ceiling system makes it easy to add faceted dimensionality and quiet elegance to interiors. Its triangular faceted pyramid faces are composed of our Soft Sound® acoustical material (100% PET plastic with up to 60% recycled content) with a metal substructure. Mix and match TriSoft's® available modules and nodes as building blocks to build faceted straight field layouts scalable to any size space. With a variety of color options, and specially engineered attachment brackets, TriSoft® is designed for maximum impact, flexibility, convenience, and acoustic performance.

# Delta Drop®

Delta Drop® brings faceted, dimensional geometry to your design, in a long, narrow panel. Plus, it offers easy installation, using quick torsion spring attachment across standard ceiling grid systems, or simple wall attachment using our Vertika channel system. Integrated backlighting is available if you want to add some light to your design, or try our Soft Sound® backer if you are looking for an acoustic solution.

Available in 2x4 and 4x4 panels fully perforated, partially perforated or solid.

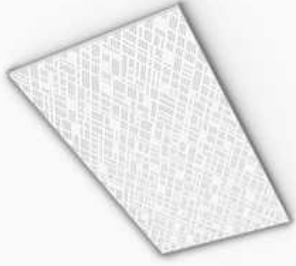

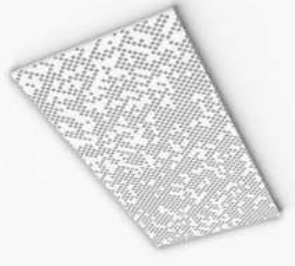

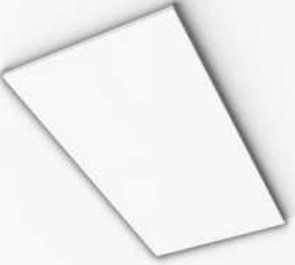

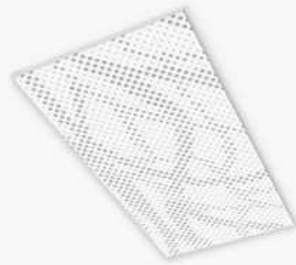

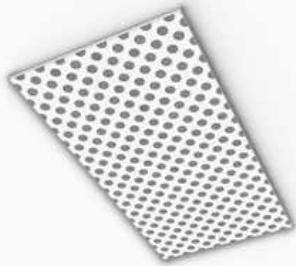

# Vapor®

Vapor® wall and ceiling panel system achieves modern expression through abstract patterns. Its subtle complexity lends visual interest across large spans and multiple spaces. Add an optional backer, select from our acoustically performative and beautiful Soft Sound® material or close off the system with our light-transmitting frosted polycarbonate backer.

Vapor® panels are manufactured from aluminum that is on average 50% thicker than the competition, which in combination with our precision processes result in unrivaled flatness.

Achieve uninterrupted patterning across your space. Vapor® patterns have perforations that wrap around the edges of each panel, concealing where patterns start and end.

As with natural wood, variation in color and grain is expected and grain will not align across panels.

# Vapor®

## Graphic Perf® Adaptive

Vapor® Graphic Perf® turns wall and ceiling tiles into a limitless canvas, combining the best aspects of two of Arktura's most popular offerings – Vapor® and Graphic Perf® – into one versatile system. Let Arktura apply its proprietary, algorithmic software and manufacturing expertise to transfer any image or pattern into perforated metal torsion spring panels. Like our Vapor® Family of Products, these are fully compatible with Arktura's Vertika® wall channel and standard grid systems, to make installation across walls and ceilings effortless. Add available custom color, Soft Sound® acoustic backer panels, and Arktura's integrated lighting, and the opportunities are truly endless.

# Graphic Perf® Solutions

Encode your building facade or interior surfaces with meaning through Arktura's customizable Graphic Perf® Solutions line of customizable panel systems. Arktura's proprietary, algorithmic software systems and manufacturing expertise make Graphic Perf® Solutions the way to inscribe any image, text, or pattern into panels tailored to your design vision.

**Larger Panel Sizes.** With a range in panel sizing, Graphic Perf® allows for larger panel specifications resulting in fewer seams and lower installation time.

**Ability to Curve Panels.** Graphic Perf® panels can be rolled to result in a smoothed, radiused application. Curves may be tailored to adapt to almost any architectural design.

# Thank You
